

# Installation of Kennel Doors

- **Quality Construction.**
- **Highest Grade Materials.**
- **Guaranteed Satisfaction.**

*Carefully follow these steps for ease of installation:*

- 1.** Position the door to cover the opening.
- 2.** Mark the location of the screw holes.
- 3.** Using a 1/8" bit, drill pilot holes.
- 4.** Using 3/16" non-corrosive pan head screws attach the doors snugly but do not tighten fully. *Attach the door with screws. Nails are not recommended.*
- 5.** After all screws are placed in the holes, adjust the final position of the door and tighten the screws.

- Our aluminum doors are designed to fit on flat surfaces.
- The doors are intended for the hinges to hang vertically (up and down).
- Installation can be with hinges either on the left or right hand side of the opening.

***Your door is now ready for many years of trouble free use.***
